SCANTOOL SB 32

New exclusive geared drill press

Danish innovation and design 

Specially designed geared drill press with more than 110 years of experience behind the construction and features

SCANTOOL SB 32

POWERFUL GEARED DRILL PRESS

The Scantool SB 32 is a heavy geared drill press, designed for both precision and durability. The drill features a robust construction and a powerful motor. To ensure optimal cooling, it has a built-in cooling system which is nicely built-into the machine with integrated cooling tank in the machine's base.

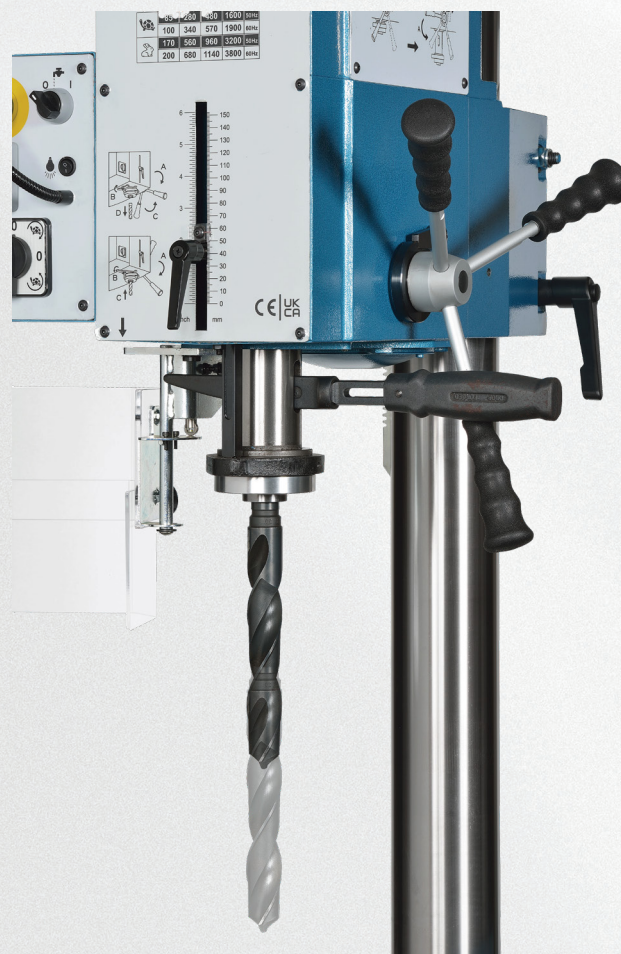

The working table is a large 360° rotating table with a centered drainage system that allows full rotation of the table. Both the working table and the machine head can be adjusted up and down for perfect working position.

The SB 32 prioritizes both comfort and safety. The machine is designed to deliver a smooth and quiet operation and for maximum safety fitted with a chuck guard with microswitch, along with a separate emergency stop for quick shutdown. Furthermore, the SB 32 is equipped with a work light for optimal working conditions with a well-lit work area.

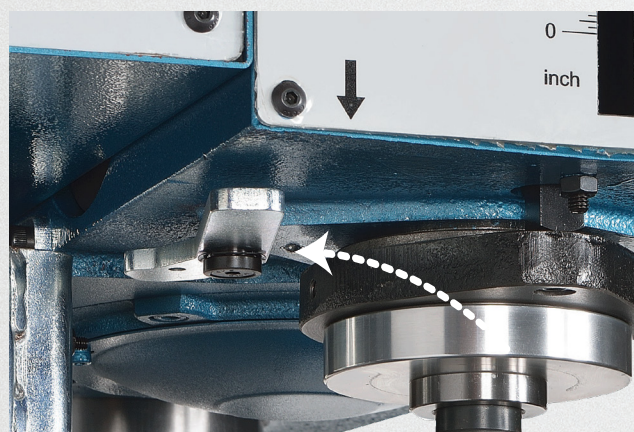

Releasing of drills can be done easily with the built-in release handle without using of tools. If necessary big drills can also be released with a drifter as on conventional drills. For use of a drifter SB 32 offers a unique feature which lock the spindle in its position for easy use of a drill drift key.

Specifications:

- Ø32mm drilling capacity
- M16 tapping capacity
- MT3 spindle taper
- 150mm spindle travel
- 85-3200 rpm
- 1100 watt motor
- 3x400 voltage
- Net weight 282 kg

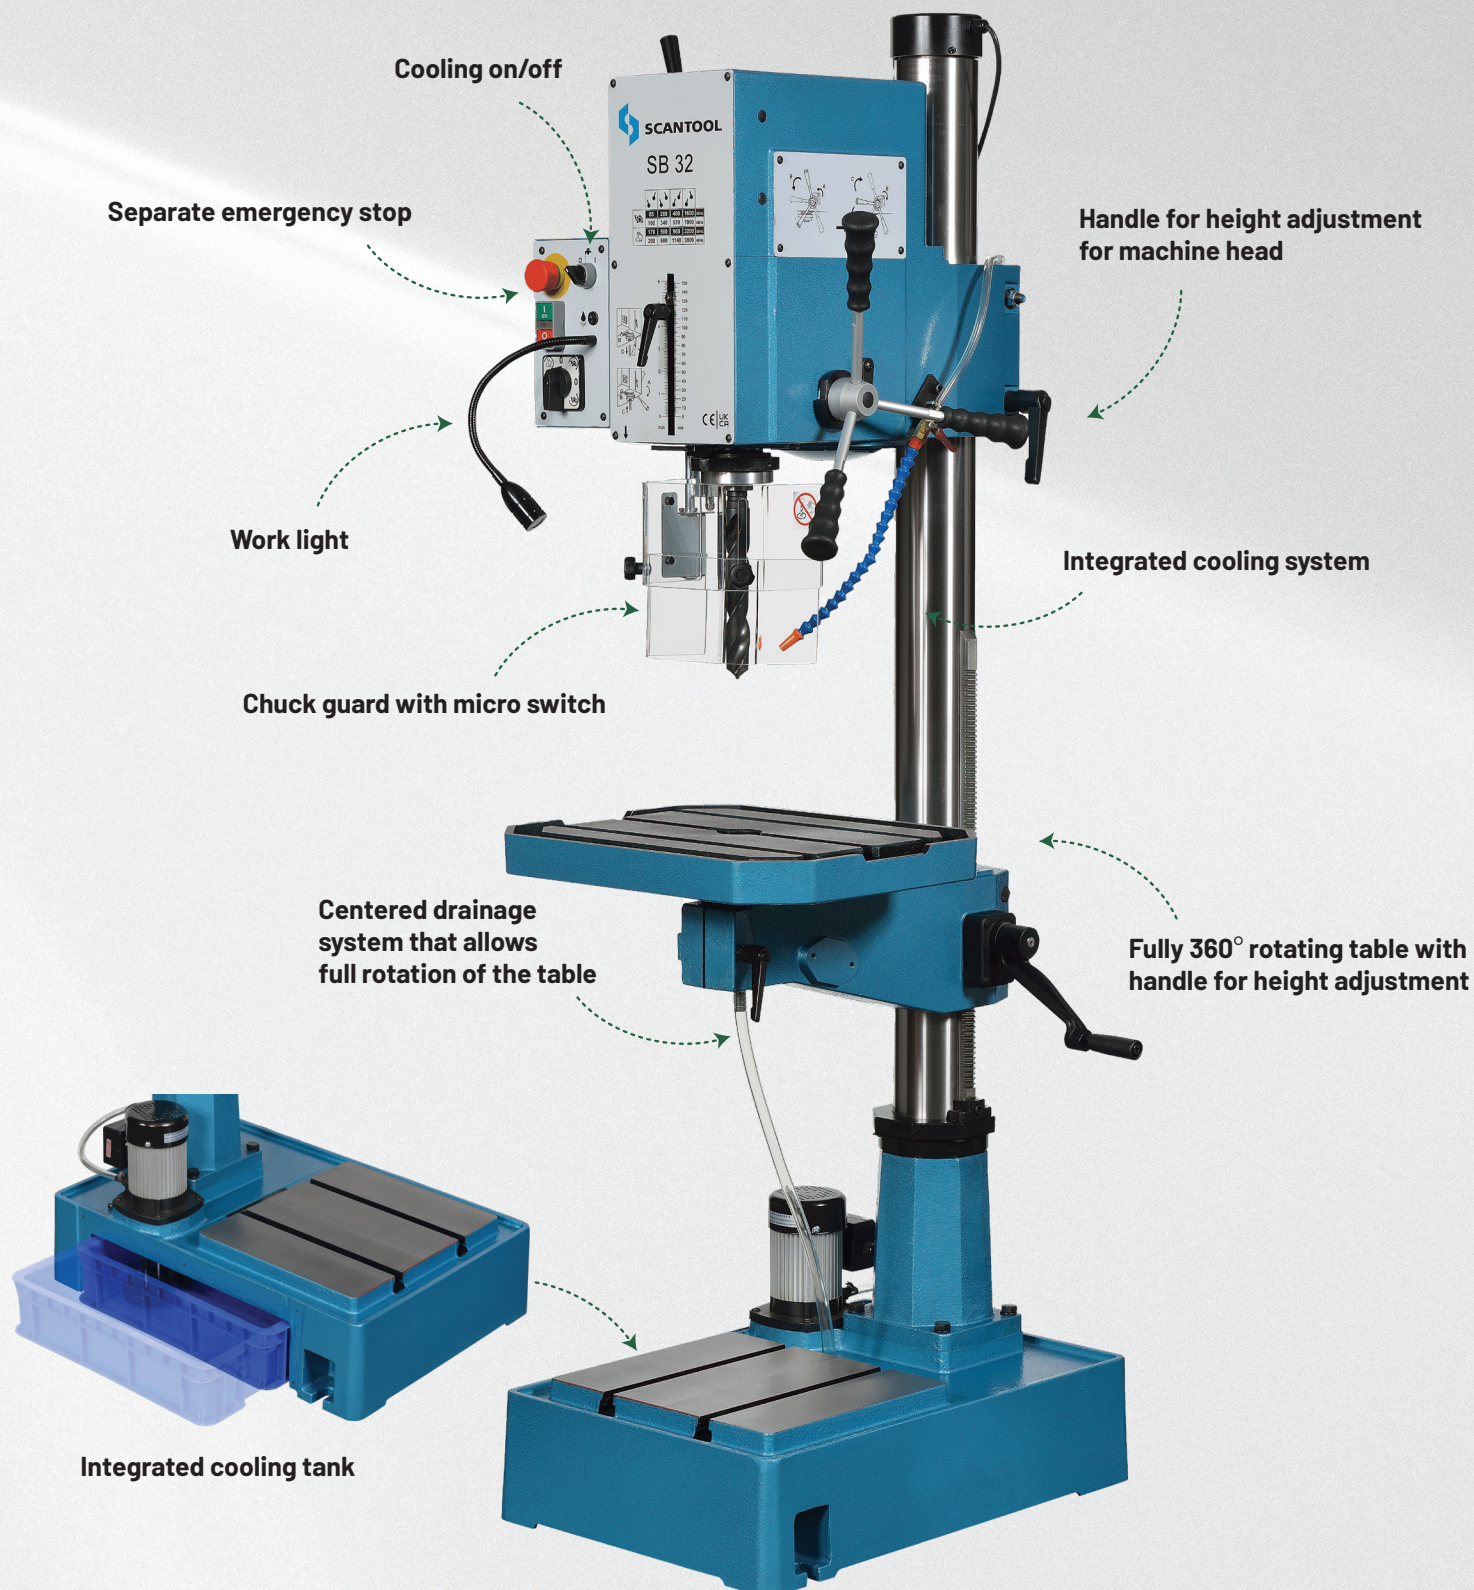

Easy release of the drill with use of a drill drift key.

Release handle. Easy release of the drill without using of tools.
